

IUS Engineering Club

Cultivating Innovation, Leadership, and Engineering Excellence

An official student-led engineering society dedicated to bridging theoretical classroom curricula with real-world technical execution, multidisciplinary teamwork, and early career leadership under the Faculty of Engineering and Natural Sciences.

OFFICIAL PROPOSAL TO THE DEANERY • ACADEMIC YEAR 2026/2027

Institutional Affiliation: Faculty of Engineering and Natural Sciences (FENS)

Presented to: Assoc. Prof. Dr. Altijana Hromić-Jahjefendić (Dean, FENS)

Faculty Academic Advisor: Prof. Dr. Leila Miller (Full Professor Dr., FENS)

Presented by: The Founding Executive Board & 11 Founding Engineering Students

Our Core Philosophy: Purpose Beyond the Classroom

Three foundational commitments designed to bridge theory with high-impact practice.

01 • PRAGMATIC FOCUS

01

Applied Engineering Practice

FROM CLASSROOM THEORY TO
WORKING SYSTEMS

Classroom lectures give students **rigorous mathematical and theoretical grounding**. Our purpose is to establish an agile, collaborative lab environment where students translate code, circuits, and algorithms into **functional, demonstrable engineering systems**.

02 • CROSS-DISCIPLINARY

02

Interdisciplinary Teamwork

BREAKING DEPARTMENTAL SILOS UNDER
FENS

Contemporary engineering challenges require multifaceted problem-solving. We intentionally unite ambitious students across **Computer Science, Software Engineering, Electrical & Electronics, and Mechanical Engineering** on joint software and hardware prototypes.

03 • REGIONAL PRESTIGE

03

Faculty Pride in Bosnia & Herzegovina

ELEVATING IUS IN THE REGIONAL TECH
ECOSYSTEM

We aim to position FENS as the **most vibrant, productive, and respected engineering faculty in Bosnia and Herzegovina** through top-tier student hackathons, hands-on workshops, and deep relationships with premier Sarajevo tech firms.

Strategic Mission & Long-Term Objectives

Four concrete pillars built to strengthen student capability, retention, and post-grad success.

01

Empower Student Leadership & Confidence

Build technical confidence, practical troubleshooting capabilities, and resilient teamwork habits through student-directed development sprints, hackathons, and technical committee ownership.

02

A Stepping Stone to Start Work Life Stronger

Accelerate early career readiness by instilling production-grade software standards, collaborative git workflows, and professional communication skills that top industry employers expect prior to graduation.

03

Build a Productive Culture of Innovation

Establish an open campus culture where students publish open-source code, engineer portfolio-ready prototypes, and confidently represent IUS in regional and international technology competitions.

04

Increase Student Belonging & Loyalty to FENS

Provide continuous peer mentorship and exciting hands-on labs so younger students stay motivated, pass demanding engineering courses, and feel profound pride in FENS.

Activity Architecture: Four Learning Tracks

A sustainable, semester-long curriculum combining weekly hands-on practice with monthly summits.

TRACK 01

Hands-On Engineering Labs

WEEKLY SESSIONS • FENS LABS

Weekly student-run practical sessions in FENS computer labs focusing on practical software building, modern AI workflows (Cursor, LLMs), git collaboration, and clean system design.

TRACK 02

Local Tech Speaker Talks

MONTHLY • IUS AMPHITHEATER

Monthly physical keynotes in the IUS Amphitheater where local software engineers, tech founders, and architects share battle-tested lessons from real commercial software projects.

TRACK 03

Online Developer Dialogues

BI-WEEKLY • ONLINE WEBINARS

Informal virtual fireside chats with international software developers, researchers, and global IUS alumni, connecting students with global engineering standards and remote career practices.

TRACK 04

Student Project Teams

CONTINUOUS • PROJECT GROUPS

Dedicated multidisciplinary student circles developing useful semester software utilities, embedded prototypes, and preparing for student engineering competitions.

Flagship Event: IUS DevHack (24-Hour Campus Hackathon)

A high-energy 24-hour innovation marathon hosted on the IUS campus to showcase technical excellence.

THE CONCEPT & FORMAT

Event Concept & Academic Structure

- 1 24-Hour Intensive Marathon**
A focused, energetic software and engineering hackathon hosted entirely on the IUS campus over a weekend block.
- 2 Friendly Competition & Growth**
Teams compete on realistic problem briefs, learning from each other through friendly peer competition and mutual support.
- 3 Experienced Industry Mentorship**
Senior students and local guest engineers provide friendly technical guidance under direct faculty supervision.
- 4 Fair Academic Evaluation**
Student projects presented to a friendly jury of FENS professors and invited tech practitioners with formal awards.

PRACTICAL LEARNING IMPACT

Educational & Institutional Impact

- ✓ **Fast Learning Through Action**
Students turn concepts learned in lecture into working code under a realistic, exciting deadline.
- ✓ **Tangible Project Portfolios**
Every team leaves with a working project and git history they can showcase on their resume and GitHub.
- ✓ **Positive Campus Culture**
Shows the broader community that IUS engineering students are active, motivated, and passionate about tech.
- ✓ **Full Safety & Lab Respect**
Strict care for university computers, pre-approved schedule, clean-desk policy, and campus security adherence.

Campus Demo Day: Sharing Student Projects

A simple, student-focused end-of-semester celebration • Scheduled for Spring 2027.

01 • DEMO EXHIBITION

Open Student Project Demos

FENS COMPUTER LABS & ATRIUM LOBBY

Students bring their laptops and hardware to showcase course assignments, club workshop projects, and small prototypes in a relaxed, friendly exhibition setting open to all peers.

02 • ACADEMIC ENGAGEMENT

Friendly Feedback from Professors

DIRECT PROFESSOR & ASSISTANT GUIDANCE

Faculty professors and teaching assistants are invited to casually walk around, view student demos, offer constructive praise, and share encouragement and academic tips.

03 • CAREER PERSPECTIVES

IUS Alumni Career Chats

REAL WORKPLACE EXPERIENCES

Recent IUS engineering graduates working locally return to campus to give short, honest talks about their first jobs, workplace realities, junior hiring expectations, and practical advice.

04 • INSPIRING UNDERCLASSMEN

Inspiring Younger Students

EARLY ACADEMIC MOTIVATION

First- and second-year students see what their peers successfully built, demystifying advanced topics and gaining clear motivation and concrete ideas to start their own projects next semester.

Practical Value for FENS & Our University

How this student-led society delivers measurable value for faculty reputation and graduate success.

01

Senior Students Mentoring Younger Peers

SELF-SUSTAINING KNOWLEDGE TRANSFER

Experienced upper-year students guide younger peers, creating a supportive cycle where students reinforce their own knowledge by teaching and building together, helping junior students pass challenging courses.

02

Higher Faculty Prestige & Student Pride

RECRUITMENT & INSTITUTIONAL STANDING

An active, visible student engineering club attracts prospective high school students during IUS Open Days and makes currently enrolled students genuinely proud to study at FENS.

03

Active Profiles that Stand Out in Job Market

GRADUATE EMPLOYABILITY ADVANTAGE

With real project work, hackathon participation, and active club involvement, our graduates stand out significantly from typical regional peers when applying for jobs and corporate internships.

04

A Lively and Productive Campus Atmosphere

CAMPUS LIFE ENRICHMENT

Making FENS much more than just lecture halls—creating an inspiring space where students naturally stay after class to discuss tech, collaborate on code, share ideas, and build things together.

Governance, Responsibility & Faculty Oversight

Institutional Discipline, Academic Alignment, and Campus Safety.

01 • ADVISOR OVERSIGHT

Faculty Academic Advisor Oversight

All workshop schedules, guest speaker invitations, and major campus events are planned under the direct guidance and prior approval of our appointed FENS Faculty Advisor, **Prof. Dr. Leila Miller**.

02 • STATUTORY RIGOR

Full University Regulatory Compliance

Organized strictly under **Article 77 of the IUS Statute** and Student Career Center (SCC) club guidelines, complete with an official club constitution, transparent elections, and zero disruption.

03 • 5/5 ACCOUNTABLE BOARD

Dedicated & Accountable Student Board

A committed 5–member Executive Board (President, VP, Secretary, Treasurer, PR Lead) ensuring transparent organization, good communication, and fair representation across all FENS engineering majors.

04 • LAB INTEGRITY

Respect for Campus Facilities & Lab Safety

Strict respect for university property, reservations limited to non-teaching hours, clean workstation policy, responsible handling of computers, and total adherence to campus safety procedures.

Conclusion & What We Request From The Deanery

Three straightforward, non-financial requests to launch this initiative for our faculty.

1 Official Faculty Endorsement

Formal Deanery approval recognizing the club under FENS and confirming our Faculty Academic Advisor (**Prof. Dr. Leila Miller**).

2 Lab and Room Access Outside Lecture Hours

Permission to schedule computer labs and the amphitheater during evenings or weekends without disrupting scheduled university classes.

3 Faculty Encouragement & Support

A short faculty notice or welcome announcement introducing the club and encouraging engineering students across FENS to participate.

“Empowering students to build, learn, and grow together at IUS.”
