

IUS Engineering Club

Cultivating Innovation, Leadership, and Engineering Excellence

An official student-led engineering society dedicated to bridging theoretical classroom curricula with **real-world technical execution, multidisciplinary teamwork, and early career leadership** under the Faculty of Engineering and Natural Sciences.

OFFICIAL PROPOSAL TO THE DEANERY • ACADEMIC YEAR 2026/2027

Institutional Affiliation: Faculty of Engineering and Natural Sciences (FENS)

Presented to: Assoc. Prof. Dr. Altijana Hromić-Jahjefendić (Dean, FENS)

Faculty Academic Advisor: Prof. Dr. Leila Miller (Full Professor Dr., FENS)

Presented by: The Founding Executive Board & 11 Founding Engineering Students

Our Core Philosophy: Purpose Beyond the Classroom

Three foundational commitments designed to bridge theory with high-impact practice.

01 Applied Engineering Practice THEORY TO WORKING SYSTEMS

Classroom lectures give students **rigorous mathematical grounding**. Our club provides the collaborative lab where students translate code, circuits, and algorithms into **functional, demonstrable systems**.

02 Interdisciplinary Teamwork BREAKING DEPARTMENTAL SILOS

Modern challenges require multifaceted skills. We intentionally unite students across **Computer Science, Software Engineering, Electrical, and Mechanical Engineering** to build joint hardware/software prototypes.

03 Faculty Pride in BiH ELEVATING IUS LEADERSHIP

Positioning FENS as the **most active, respected engineering faculty in Bosnia and Herzegovina** through student hackathons, hands-on workshops, and deep partnerships with Sarajevo tech firms.

⚡ STUDENT-LED EXECUTION

Hands-On Practice in FENS Labs

Students coding and prototyping collaboratively after class.

Strategic Mission & Long-Term Objectives

Four concrete pillars built to strengthen student capability, retention, and post-grad success.

01

Empower Student Leadership & Confidence

Build deep technical confidence, practical troubleshooting capabilities, and resilient teamwork habits through **student-directed development sprints, hackathons, and technical committee ownership.**

02

A Stepping Stone to Start Work Life Stronger

Accelerate early career readiness by mastering **production-grade software workflows, collaborative Git practices, and modern industry engineering standards** before graduation.

03

Build a Productive Culture of Innovation

Establish an open campus culture where students **publish open-source code, engineer portfolio prototypes, and represent IUS in regional and international tech competitions.**

04

Increase Student Belonging & Loyalty to FENS

Provide **continuous peer mentorship and hands-on labs** so younger students stay motivated, pass demanding engineering courses, and feel genuine pride in FENS.

Activity Architecture: Four Learning Tracks

A sustainable, semester-long curriculum combining weekly hands-on practice with monthly summits.

TRACK 01

Hands-On Engineering Labs

WEEKLY SESSIONS • FENS LABS

Weekly practical sessions in FENS computer labs focusing on **software building**, **modern AI coding workflows** (Cursor, LLMs), **git collaboration**, and **clean architecture**.

TRACK 02

Local Tech Speaker Talks

MONTHLY • IUS AMPHITHEATER

Monthly physical keynotes in the amphitheater where **Sarajevo software engineers**, **tech founders**, and **architects** share **battle-tested lessons from commercial projects**.

TRACK 03

Online Developer Dialogues

BI-WEEKLY • ONLINE WEBINARS

Virtual fireside chats with **international software developers** and **global IUS alumni**, connecting students with **global engineering standards** and **remote work**.

TRACK 04

Student Project Teams

CONTINUOUS • PROJECT GROUPS

Dedicated multidisciplinary student circles developing **useful semester software utilities**, **embedded prototypes**, and preparing for **student engineering competitions**.

Flagship Event: IUS DevHack (24-Hour Campus Hackathon)

A high-energy 24-hour innovation marathon hosted on the IUS campus to showcase technical excellence.

THE CONCEPT & FORMAT

24-Hour Intensive Marathon

A focused, energetic software and engineering hackathon hosted entirely on the IUS campus over a weekend. Teams compete on **realistic problem briefs**, **learning from each other through friendly peer collaboration**, **senior mentorship**, and **faculty evaluation**.

PRACTICAL LEARNING IMPACT

Hands-On Portfolios & Lab Respect

Students turn theoretical classroom concepts into **working project portfolios on GitHub and resumes**. Strict care for university property, pre-approved schedule, clean workstations, and standard campus safety procedures.

Campus Demo Day: Sharing Student Projects

A simple, student-focused end-of-semester celebration • Scheduled for Spring 2027.

01 Open Student Project Demos

FENS COMPUTER LABS & ATRIUM LOBBY

Students bring their laptops and hardware to showcase **course assignments, club workshop projects, and prototypes** in a relaxed, friendly exhibition open to all peers.

02 Faculty Feedback & Mentorship

DIRECT PROFESSOR & TA GUIDANCE

Faculty professors and teaching assistants walk around, **view student demos, offer constructive praise, and share encouragement and academic tips.**

03 Alumni Chats & Inspiring Underclassmen

DEMYSTIFYING ENGINEERING CAREERS

Recent graduates share honest career advice, while first- and second-year students see what is possible, **gaining clear motivation to start their own engineering projects.**

ACADEMIC ENGAGEMENT

Campus Demo Day • Spring 2027

Students demonstrating prototypes and discussing tech with professors.

Practical Value for FENS & Our University

How this student-led society delivers measurable value for faculty reputation and graduate success.

01

Senior Students Mentoring Younger Peers

SELF-SUSTAINING KNOWLEDGE TRANSFER

Experienced upper-year students guide younger peers, creating a **supportive academic cycle where students reinforce their knowledge by teaching and building together.**

02

Higher Faculty Prestige & Student Pride

RECRUITMENT & INSTITUTIONAL STANDING

An active engineering club **attracts prospective high school students during IUS Open Days** and makes currently enrolled students genuinely proud to study at FENS.

03

Active Profiles that Stand Out in Job Market

GRADUATE EMPLOYABILITY ADVANTAGE

With real project work, hackathon awards, and active club involvement, **our graduates stand out significantly when applying for jobs and corporate internships.**

04

A Lively and Productive Campus Atmosphere

CAMPUS LIFE ENRICHMENT

Making FENS much more than just lecture halls—**creating an inspiring space where students naturally stay after class to discuss tech, code, and build things together.**

Governance, Responsibility & Faculty Oversight

Institutional Discipline, Academic Alignment, and Campus Safety.

01

Faculty Academic Advisor Oversight

PROF. DR. LEILA MILLER

All workshop schedules, guest speaker invitations, and major campus events are planned under the **direct guidance and prior approval of our appointed FENS Faculty Advisor, Prof. Dr. Leila Miller.**

02

Full University Regulatory Compliance

ARTICLE 77 & SCC RULES

Organized strictly under **Article 77 of the IUS Statute and Student Career Center (SCC) club guidelines**, complete with an official club constitution and transparent elections.

03

Dedicated & Accountable Student Board

5/5 FULL CORE LEADERSHIP

A committed **5-member Executive Board (President, VP, Secretary, Treasurer, PR Lead)** ensuring transparent organization, good communication, and fair representation across all FENS majors.

04

Respect for Campus Facilities & Lab Safety

LAB CARE & ZERO DISRUPTION

Strict respect for university property, **reservations limited to non-teaching hours, clean workstation policy, and total adherence to campus safety procedures.**

Conclusion & What We Request From The Deanery

Three straightforward, non-financial requests to launch this initiative for our faculty.

1 Official Faculty Endorsement

Formal Deanery approval recognizing the club under FENS and confirming our Faculty Academic Advisor (**Prof. Dr. Leila Miller**).

2 Lab & Room Access Outside Lecture Hours

Permission to schedule **computer labs** and the **amphitheater** during **evenings** or **weekends** without disrupting scheduled university classes.

3 Faculty Encouragement & Support

A short faculty notice or welcome announcement introducing the club and **encouraging engineering students across FENS to participate**.

“Empowering students to build, learn, and grow together at IUS.”
